

Weekly Reports

Luftqualität in Innenräumen - Gruppe 1

27. November 2021

1 Überblick

1.1 Friedrich Just

Usually when using a \LaTeX document sections and paragraphs are used to categorize your content. Down below you'll find some examples how to create and use sections and paragraphs. As you will see the enumeration of the sections and subsections will be done automatically.

1.2 Stipe Knez

1.3 Lucas Merkert

1.4 Achim Glaesmann

1.5 Max-Rene Konieczka

1.6 Can Cihan Nazlier

2 Tables

Down below you'll see a simple example of a table with two columns. If you want to reference a table, the same command applies as when referencing to an image: **Table ??**

Optimization Flag	Execution Time (ms)
-O0	809-812
-O1	612-663
-O2	404-406
-O3	405-406
-Os	339-341

Tabelle 1: Comparison of execution time with different optimization levels

2.1 Internet sources

Sources out of the internet are often used by students, but **do not** only provide the URL of the source. You'll always need to state the author, title and your last access to the website as well! If you look in the References section down below, you'll see how to reference a web source correctly.
